

Friends of Kwezana Primary

Water Tank Update

Through the generous donations of families in Settle and The Church Of The Holy Ascension we are now able to pay for the repair of guttering at Kwezana Primary School and also the installation of a 5,000L water tank. This water source will enable the school to provide water for drinking, cooking and washing during periods when the school tap has dried up.

Although Kwezana Primary is lucky to have a tap within school grounds, its operation depends on water from a reservoir further up the valley. If the reservoir dries up, which it often does during the hot summer months, the school is unable to provide water to the children during the school day.

The Broken Guttering

The Friends of Kwezana would like to thank everyone who has helped to make this possible through their generous donations during end of term church services.

Miss Entwistle and Mr Freytag will be visiting Kwezana School during August to facilitate the guttering repairs and tank installation, as well as continue linked school projects. Look out for pictures of the new tank installation and other news from their trip in our next newsletter.

A similar style water tank.

Photos From Kwezana

Another selection of images from around Kwezana taken by Mrs Gape and the children using a camera Mrs Gape brought them to use.

Celebrating Differences

As we reach the end of another year at Settle Primary School our Year 6 children will be leaving us to continue their education in new schools.

In the UK, the end of our school year and the summer term is in July. In South Africa, children move up to new schools in January and July is their winter term.

The different timing of our seasons and the school year, helps children from both schools to understand how seasons vary around the world and how big changes in our lives may be the same but may occur at different times in our lives.
